  UPPERCASE MENU TEXT: NETWORK HEALTH EXCHANGE ADD PA

 AFJXNH PURGE NIGHTLY   MENU TEXT: Network Health Exchange Nightly Purge
  TYPE: run routine                   CREATOR: POSTMASTER
  PACKAGE: NETWORK HEALTH EXCHANGE
 DESCRIPTION:   PURGE MESSAGES NIGHTLY FROM MAILBOX OF NETWORK HEALTH EXCHANGE
 GENERIC USER.
  ROUTINE: AFJXPNHX                   SCHEDULING RECOMMENDED: YES
  UPPERCASE MENU TEXT: NETWORK HEALTH EXCHANGE NIGHTL

 DG ALL ADDRESS CHANGE REPORT      MENU TEXT: Report - All Address Changes
  TYPE: run routine                   CREATOR: XXXXXXXXXX
  PACKAGE: REGISTRATION
 DESCRIPTION:   This report lists changes to any of the patient primary address
 fields for the previous 24 hours.
  ROUTINE: EN^DGREGARP("ALL")         TIMESTAMP: 59344,38919
  SCHEDULING RECOMMENDED: YES
  UPPERCASE MENU TEXT: REPORT - ALL ADDRESS CHANGES

DG G&L RECALCULATION AUTO  MENU TEXT: Auto-recalculation of G&L Statistics
  TYPE: run routine                   CREATOR: POSTMASTER
  RESTRICT DEVICES?: .5               PACKAGE: REGISTRATION
 DESCRIPTION:   This option uses the G&L CORRECTIONS file as to determine what
 the oldest correction on file is for which the census hasn't been updated.
```

```
 All census data from that date forward will be updated to reflect accurate
 totals.  This option should be queued to run every night.
   ROUTINE: AUTO^DGPMBSAB             SCHEDULING RECOMMENDED: YES
   UPPERCASE MENU TEXT: AUTO-RECALCULATION OF G&L STAT

DG PTF BACKGROUND JOB             MENU TEXT: PTF Background Job
  TYPE: run routine                CREATOR: POSTMASTER
  PACKAGE: REGISTRATION
 DESCRIPTION:   Update to run nightly to update length of stay in PTF record
 for active admission records and to update means test indicator in PTF in Open
 PTF records.
   ROUTINE: ACTIVE^DGPTFUP           SCHEDULING RECOMMENDED: YES
   UPPERCASE MENU TEXT: PTF BACKGROUND JOB

DG SENSITIVE RCDS RPT-TASK   MENU TEXT: ISO Sensitive Records Report Tasked
  TYPE: run routine                CREATOR: XXXXXXXXX
  PACKAGE: REGISTRATION
 DESCRIPTION:   This option will automatically send a VistA email to the mail
 group of DG ISO SENSITIVE RCRDS.  This report gives a summary of all sensitive
 patient records accessed for the previous day.  It includes: patient name,
 user name, title of user, option/protocol that was used when the patient
 record was accessed, date/time the record was accessed and if the patient
 record was an inpatient at the time.
   ROUTINE: EN^DGISORPT               TIMESTAMP OF PRIMARY MENU: 60128,39249
   UPPERCASE MENU TEXT: ISO SENSITIVE RECORDS REPORT T

DG SERIOUSLY ILL LIST  MENU TEXT: Seriously Ill Inpatient Listing
  TYPE: run routine                CREATOR: POSTMASTER
  PACKAGE: REGISTRATION
 DESCRIPTION:   This option is used to generate a listing of those inpatients
 remaining on the Seriouslly Ill list.
   ROUTINE: LIST^DGSILL               TIMESTAMP OF PRIMARY MENU: 60596,50095
   UPPERCASE MENU TEXT: SERIOUSLY ILL INPATIENT LISTIN

DGBT LOCAL VENDOR UPDATE         MENU TEXT: Update Local Vendor (COREFLS)
  OUT OF ORDER MESSAGE: CoreFLS Disabled (DBGT*1*9)
  TYPE: run routine                CREATOR: XXXXXXXXX
  PACKAGE: BENEFICIARY TRAVEL
```

DESCRIPTION: Option performs scheduled (or unscheduled) update of the Local
 Vendor file (#392.31) with records from the CoreFLS Vendor tables.
    ROUTINE: DGBTVUP
    UPPERCASE MENU TEXT: UPDATE LOCAL VENDOR (COREFLS)

DGJ IRT UPDATE (Background)   MENU TEXT: IRT Update Std. Def. Background Job
   TYPE: action   CREATOR: XXXXXXXXX
   PACKAGE: INCOMPLETE RECORDS TRACKING E ACTION PRESENT: YES
 DESCRIPTION: This is the background job that will run nightly, after
 midnight, which will update all admissions for the previous day, by creating
 an IRT entry for all the standard deficiencies for the facility.
    ENTRY ACTION: D AUTO^DGJBGJ   TIMESTAMP: 55710,40217
    SCHEDULING RECOMMENDED: YES
    UPPERCASE MENU TEXT: IRT UPDATE STD. DEF. BACKGROUN

DGPF BACKGROUND PROCESSING MENU TEXT: Patient Record Flag Background
   TYPE: run routine   CREATOR: XXXXXXXXXXX
   PACKAGE: REGISTRATION
 DESCRIPTION: This option should be scheduled to run once a day. The
 following functions are processed by this background option: 1. Send review
 notification messages for pending Patient Record Flag Assignment reviews. 2.
 Auto retransmitting of rejected HL7 Patient Record Flag Assignment messages.
    ROUTINE: EN^DGPFBGR   SCHEDULING RECOMMENDED: YES
    KEEP FROM DELETING: Yes
    UPPERCASE MENU TEXT: PATIENT RECORD FLAG BACKGROUND

DGPRE PRE-REGISTER NIGHT JOB   MENU TEXT: Preregistration Nightly Job
   TYPE: run routine   CREATOR: XXXXXXXXX
 DESCRIPTION: This job will delete/add new entries to the Pre-registration
 call list. This job should be scheduled to run nightly through the OPTION
 SCHEDULING file.
    ROUTINE: EN^DGPREBJ   SCHEDULING RECOMMENDED: YES
    UPPERCASE MENU TEXT: PREREGISTRATION NIGHTLY JOB

 DGQE BACKGROUND PROCESSING   MENU TEXT: VIC Background Processing
   TYPE: run routine   CREATOR: XXXXXXXX
    PACKAGE: REGISTRATION

```
  DESCRIPTION:   This option calls the background processing driver for the VIC
 Redesign project.  The option should be scheduled to run daily using TaskMan.
  ROUTINE: EN^DGQEBGR
  UPPERCASE MENU TEXT: VIC BACKGROUND PROCESSING

DGRU ASIH BACKGROUND JOB          MENU TEXT: RAI ASIH Background Processor
  TYPE: run routine                     CREATOR: XXXXXXX
 DESCRIPTION:   Checks if any ASIH patients have exceeded 30 days.
  ROUTINE: EN^DGRUASIH
  UPPERCASE MENU TEXT: RAI ASIH BACKGROUND PROCESSOR

DGRU RAI BATCH UPDATE   MENU TEXT: Background job for updating RAI/MDS COTS
  TYPE: run routine                     CREATOR: XXXXXXXXX
  PACKAGE: REGISTRATION
 DESCRIPTION:   This option is not intended to be run from programmer mode.  No
 output to the screen is intended.  When this job is scheduled through TaskMan
 it will collect and transmitt all the entries in the PIVOT file that are a
 COTS UPDATE to patient information . The job will build DGRU PATIENT A08 HL7
 v2.3 messages and broadcast them to the COTS subscriber the TCP linkage. The
 job should be re-scheduled to run about every 10 minutes. The task interval
 will determine approximately the maximum time it takes for an update to
 patient information to be broadcast in a HL7 message.
  ROUTINE: EN^DGRUGBJ                   SCHEDULING RECOMMENDED: YES

RG EXCEPTION PURGE                    MENU TEXT: MPI/PD Exception Purge
  TYPE: run routine                      CREATOR: XXXXXX
  PACKAGE: CLINICAL INFO RESOURCE NETWORK
 DESCRIPTION:   The MPI/PD Exception Purge [RG EXCEPTION PURGE] option purges
 entries from the CIRN HL7 EXCEPTION LOG (#991.1) file.  Entries that are
 purged include duplicate entries, resolved entries over 30 days old, and
 entries for patients were the name field is null or the patient has been merge
 (i.e., has a -9 node.)  Additionally, only the most recent Primary View Reject
 exception for a given patient/date is retained.
 This option should be scheduled to run via Taskman once an hour.  (This
 recommendation was added in patch RG*1*48.)
  ROUTINE: MAIN^RGEVPRG

SDAM BACKGROUND JOB MENU TEXT: Appointment Status Update (Background)
   TYPE: action                          CREATOR: XXXXX
   PACKAGE: SCHEDULING                   E ACTION PRESENT: YES
 DESCRIPTION:   This option will update the appointment status for today's
 outpatient encounters. If an encounter has not been checked-in, no-showed or
 cancelled, then it will be given the status of 'NO ACTION TAKEN'.  Such
 encounters will not be used as part of NPCDB workload reporting.
 This option should be queued to be run daily.
 Also, this option will update any encounter date in the last thirty days that
 has not been updated.  This will help keep the encounter dates updated in case
 the option does not execute, for any reason, on a particular date.
 Note: Inpatient encounters and encounters for 'non-count' clinics are
       not updated since they are not reported to Austin for workload
       credit.
```

```
 A Mailman message will be sent to the mail group specified by the APPT. UPDATE
 MAIL GROUP site parameter. The message will indicate the overall results of
 this background job by providing the following information:
             o  clinic
             o  number of encounters that flagged as 'no action taken'
             o  the total number of encounters
             o  percentage flagged as 'no action taken'
